18	Vocal Backings (Timi)	Shure SM58 our own
19	Sampler Left	DI our own
20	Sampler Right	DI our own

We bring all Microphones and Stands by ourselves

Front

PA-System: A full range PA-system with enough power for the specific venue, in phase and in full working order.

Mixing-Console: We bring our own Presonus StudioLive CS18AI/RM32AI console with us

Stage

We bring our own inear monitoring console, our own DI's and microphones. All signals in the channel list go first to our monitor console where we split them to your multicore on stage.

Multicore We need a **CAT 5** connection from the FOH to the stage

Power Power supply for backline (230 VAC) (**see stageplan**)

Light

We bring our own 2 striplight-blinders, 2 LED-striplights and a few PAR56 lights with us. For the appropriate light control we need a bus bar type 13 to a light phase which is separately fused. (~ 2000 watts)

If the venue allows it we bring some pyro- and confetti shots and also 4 smoke machines (~ 500 watts each) with us.

Frequency-List

Bass Timi	2.4GHz band	Guitar Chrigu	2.4GHz band	
InEar Michu	621.275	InEar Timi	652.400	InEar Chrigu 646.075
InEar Sandro	518.750	InEar Backl.	553.250	

One system engineer provided by the club or the local PA company has to be present from our arrival until the end of the showcase.

This is just a basic setup. If you have another PA system just let us know. If your PA has similar specifications it's no problem for us to play on your system.
